

YASHIN CHAUHAN

Full-Stack Software Developer | React.js · Next.js · Node.js · NestJS · PHP/Laravel

Delhi, India | +91 7988775272 | yashin123786@gmail.com | github.com/yashin-chauhan | linkedin.com/in/yashin-chauhan

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 5+ years of experience designing and shipping production web applications, enterprise SaaS platforms, multi-branch logistics ERPs, and high-performance REST APIs using React.js, Next.js, Node.js, Express.js, NestJS, PHP/Laravel, PostgreSQL, MySQL, and MongoDB. Skilled in multi-tenant architecture, immutable double-entry financial ledgers, print-exact document rendering (DomPDF), and background job processing (Redis/BullMQ), with a track record of taking systems from architecture through production deployment.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js (App Router), HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery

Backend: Node.js, Express.js, NestJS, Fastify, PHP (7.4/8.x), Laravel (8/10), RESTful APIs, Microservices Architecture

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma 7, Eloquent ORM, Database Indexing & Query Optimization

Queues, Cloud & Tools: Git, GitHub, Redis, BullMQ, AWS, Cloudflare, Nginx, PM2, DomPDF, DataTables, Laravel-Excel

WORK EXPERIENCE

Bakuun Pvt. Ltd. — Full Stack MERN Developer 2024 – 2026

- Architected and maintained RESTful APIs and admin portal features across multiple Bakuun travel-tech portals, enabling seamless partner integrations for 20+ third-party hotel and travel supply providers.
- Built hotel and travel data synchronization pipelines and booking state machines using React.js, Node.js, Express.js, and MongoDB, reducing booking data mismatches by 40% and cutting manual reconciliation effort.
- Diagnosed and resolved critical production bottlenecks and optimized high-throughput MongoDB queries and indexes, sustaining 99.9% platform uptime across 5+ core services.
- Led root-cause analysis and proactive debugging for production incidents, reducing average resolution time (MTTR) by 35%.

GlobalLogic Pvt. Ltd. — Full Stack MERN Developer Aug 2023 – Jan 2024

- Developed and enhanced RESTful APIs and backend microservices for enterprise-scale web applications supporting 15,000+ daily active users.
- Collaborated with distributed cross-functional teams to optimize API response times by 30% through query caching and payload optimization, improving maintainability and end-user experience.

Digitally Bird Pvt. Ltd. — Full Stack Developer Apr 2022 – Aug 2023

- Engineered responsive web applications and institutional portals, including the Dr. YSP University faculty onboarding ERP and dynamic multi-campus platform using Laravel 8, MySQL, and React.js.
- Built asynchronous institutional email domain verification with session-bound OTP challenges and automated notice/tender expiration lifecycles.
- Reduced frontend bundle size by 28% using code-splitting and lazy loading, improving First Contentful Paint (FCP) across client platforms.

Native Developers — Backend Engineer 2021 – 2022

- Built and maintained core REST API endpoints in Node.js and Express.js, implementing structured request validation and secure authentication workflows.
- Improved backend test coverage from 45% to 80% using automated unit tests, significantly reducing regression bugs in production releases.

FEATURED PROJECTS

RentKhata — Enterprise PG & Co-Living Operating Platform (Next.js 15, NestJS 11, React Native / Expo 52, PostgreSQL, Prisma 7, Redis / BullMQ)

- Architected an end-to-end multi-tenant property management platform modeling deep inventory hierarchies (Property → Floor → Room → Bed).
- Engineered an append-only double-entry financial ledger calculating all balances in integer paise (₹1.00 = 100 paise) to eliminate floating-point rounding errors.
- Automated utility sub-meter electricity billing and a tenant self-service portal with UPI payment workflows, backed by contract-first OpenAPI type generation.

Compass Transport — *Regional Freight Logistics ERP & Billing Engine* (Laravel 8, MySQL 8, Blade, DomPDF, Laravel-Excel, jQuery)

- Engineered a multi-branch logistics ERP with session-isolated dispatch contexts (Delhi & Ambala hubs), eliminating invoice serial number collisions across branches.
- Built a dynamic counter bilty billing engine with instant AJAX client auto-completion, real-time client-side balance calculations, and automated GST allocation.
- Implemented print-exact vector PDF generation (DomPDF) for Lorry Receipts (Bilties) and date-filtered Excel export for financial audits.

Gems Testing India (GTI) — *Gemological Lab Management & Public Verification* (Laravel 10, MySQL 8, DomPDF 2.0, Yajra DataTables, Laravel-Excel)

- Engineered a universal report lookup engine using high-performance SQL UNION queries, delivering sub-8ms search resolution across 4 product divisions.
- Built an automated landscape PVC certificate PDF generator (400×590 pt) with Base64-embedded seals, integrated with server-side Yajra DataTables.

Pragya Crop Advisory — *Bilingual AgriTech Intelligence Platform & REST API* (Laravel 10, MySQL 8, REST API Architecture, Devanagari UTF-8 Localization)

- Architected a standalone Laravel 10 REST API backend for Pragya NGO, delivering 12-stage scientific agronomic lifecycle guidance to rural farmers.
- Engineered composite relational queries linking plant disease symptoms directly to actionable chemical and biological remedies in unified, single-request payloads.

Dr. YSP University — *Institutional Web Platform & Academic Faculty ERP* (Laravel 8, MySQL 8, Blade, DataTables, jQuery AJAX, Bootstrap 4)

- Engineered institutional faculty onboarding portal with institutional domain verification, session-bound OTP validation, and dynamic faculty page binding (getFaculty).
- Built automated date-filtered tender and circular auto-expiry engine and dynamic curriculum table manager across 4 colleges and 10 research/extension centers.

EDUCATION

Bachelor of Arts (BA) — Maharshi Dayanand University (MDU Rohtak) 2019 – 2022
